QBL LED

Retrofit Technology

Upgrade PestWest® fly control units & embrace UVA led technology!

Why throw away recent purchases when you can upgrade?

Our leading Chameleon® traps with fluorescent tubes can be transformed into LED units to provide significant savings in electricity, lower the environmental impact and improve the management of energy usage.

Engineered to work effectively with the Chameleon® 1x2, 2x2 and Uplight models.

The transformation is simple:

A straightforward switch of the fluorescent tubes, the starters and the glue boards, with PestWest QBL LED retrofit tubes, LED starters and LED optimised glue boards.

The upgraded unit will offer all the main advantages of LED technology.

- Mercury free
- Environmentally sustainable
- 3-year tube lifespan
- Low power consumption

Comparison of power consumption in Watts

* Calculated with an average cost of electricity of 28p per kWh and 10 units per site.

Welcome to PestWest Australia – Your Trusted Partner in Flying Insect Control Solutions!

Who We Are

At PestWest Australia, we know how disruptive flying insects can be to homes, businesses, and communities.

That's why we're focused on providing innovative, reliable, and eco-conscious insect control solutions. With more than 50 years in the industry, we've become a trusted name in pest control both locally and globally.

Our Mission

Our mission is clear and impactful:

To help protect homes, workplaces, and the environment from flying insect threats.

We accomplish this by offering advanced, science-based products that are designed to be effective, reliable, and environmentally responsible.

What Sets Us Apart

Expertise

Our team is made up of experienced and knowledgeable professionals who are passionate about pest control.

We stay on the leading edge by regularly refining our skills and techniques to make sure we're offering the best service and solutions to our clients.

Comprehensive Solutions

Whether you're tackling everyday house flies or managing more complex pest issues in a commercial setting, we're here to help.

PestWest Australia provides a wide range of advanced UV light traps that can be tailored to meet your specific requirements.

Eco-Friendly Practices

We value the health and safety of our customers, their loved ones, and the environment.

That's why we incorporate sustainable materials and practices that reduce ecological impact while still providing powerful insect control.

Customer-Centric Approach

Customer care is at the foundation of everything we do. We take the time to understand your needs and create solutions that fit.

Our helpful and knowledgeable team is always available to answer questions, provide advice, and ensure your complete satisfaction.

Quantum X LED Units

Find us on:

PestWest Starkeys' latest development offers even more environmentally responsible models.

All of these units incorporate the new Quantum® X LED tubes and are on the cutting edge of energy efficient lighting technology. The innovative designs allow for highly efficient, yet discreet, models which allows us to take fly control to a whole new level.

Quantum X LED Units

Find us on:

Chameleon[®] EXG

This custom-designed unit has been exclusively engineered to allow protection in areas where gas and vapour are present such as: distilleries and in the petrochemical and pharmaceutical industries.

Fitted with two Quantum X shatterproof tubes and the dedicated LED range glue board, the Chameleon[®] EXG X is made to comply with exacting ATEX standards (ATEX Directives 99/92/EC and 94/9/ EC) and is made from the highest quality materials to give a fully corrosion-resistant construction using 304-brushed stainless steel and Marine-grade aluminium alloy.

It is suitable for use in zones 2 and 1 - atmospheres where flammable gases/vapours are likely to arise and zones 22 and 21 - atmospheres where combustible dust/powder may be present.

ON-TOP *PRO*

ON-TOP *PRO2*

Innovative and discreet, the unique overhead design fits easily into new or existing suspended ceilings.

This discreet and stylish LED system is designed to be suspended ceiling installed. This patented concept offers an ideal solution for supermarkets, convenience stores, fast-food restaurants, and many others. The perfect solution to limited or no wall space.

The bodywork is a conformal zintec steel (rust-resistant) chassis. An exclusive polished aluminum reflector optimizes flying insect capture through LED UVA light specular reflection. The cover is brushed stainless steel.

The ON-TOP PRO2 X features a curved stainless steel front which holds the Quantum® X LED system glue board. The front easily pivots for convenient service and maintenance.

Find us on:

Chameleon® STELLARIS X

A unique double-sided LED UV fly control unit for large, open industrial areas.

The patent pending design maximises the 360° UV output of the Quantum® X LED technology to increase energy savings and reduce consumables with no compromise on fly control performance. The Chameleon Stellaris consumes 6 times less than its equivalent Chameleon model with fluorescent tubes and 3 times less than most other LED suspended models with a similar coverage area. Its full metal construction further reduces the environmental impact.

The servicing is fast and easy with direct access to consumables, notably the lateral insertion and withdrawal of the LED optimised glue boards.

QBL Retrofit LED Units

Find us on:

Introducing the QBL Retrofit LED range by PestWest – units upgraded with cutting-edge LED technology!

With these units, you gain the advantages of LED technology, including a lifespan of 3 years, power efficiency, and cost savings. LEDs are environmentally friendly as they consume less energy, contain no toxic materials like mercury found in fluorescent lights, and are recyclable. Overall, LED units represent a modern and sustainable lighting choice that offers economic, environmental, and operational advantages for various applications.

Good to know: With QBL Retrofit LED tubes, you have the flexibility to transform all your 15-watt fluorescent units to LED units.

QBL Retrofit LED Units

Find us on:

SUNBURST[®] QBL LED

Stylish, discreet, and environmentally responsible UVA LED fly control.

An elegant and decorative insect light trap, designed for customer-facing spaces where discreet yet effective fly control is required. The Sunburst LED uses a QBL UVA LED bulb with 60 emitters, distributing light evenly across 360° for optimum coverage.

The QBL UVA LED bulb reduces energy consumption to just 10W – less than half that of the fluorescent model – while offering double the lifespan and improved performance.

Professional Sticky Traps

Find us on:

Our Professional Sticky Traps are high quality units combining advanced glue board technology with slim-line designs.

They catch insects securely allowing units to be placed closer to sensitive areas. They do not have an electric killing grid making them silent, discreet and hygienic whilst catching all sizes of insects including smaller species such as Fruit Flies. Their consumables can easily and quickly be accessed without the need for a tool.

Professional Sticky Traps

Find us on:

Chameleon® 1x2

Attractive, slim, wall-mounted (free standing bracket available), compact and unobtrusive, this unit is ideal for use in food preparation areas.

Chameleon® 1x2 units are ultra-slim, easy to maintain, compact and unobtrusive and only require a periodical change of glue boards and an annual tube replacement to maintain optimum performance.

With the Chameleon® 1x2, insects are caught cleanly and safely onto the glue board. No noise, no smell, no problem. This allows the equipment to be placed closer to sensitive areas.

Chameleon® units from this range use interchangeable tubes and sticky boards to minimise stocking requirements.

or send us an Email**

Hints & Tips

Find us on:

UV fly killers

- To maintain maximum effectiveness, tubes should be changed at least every 12 months, preferably at the onset of warmer weather.
- Quantum® tubes are recommended, as their effective lifespan is longer than most other tubes, which reduces the amount of maintenance required.
- Use a UV-A Meter to measure the ultra-violet output of tubes, to give you an instant indication of tube effectiveness and their remaining life.
- If the unit requires starters, replace them at the same time that you change the tubes.

Hints & Tips

Find us on:

Additionally for UV sticky traps

- Use Reflectobakt® sleeves to maintain optimum fly control performance particularly when the glue board and the tubes are placed close together.
- Replace the sticky boards every 2 months to ensure maximum efficacy.

Additionally for Electronic Fly Killers (EFKs)

- Use a grid tester to test the killing grid without shorting the high tension current onto the metal body of the machine, as often happens when using a conventional screwdriver (unless the unit has a high voltage 'grid-on' indicator like the Nemesis Quattro line).
- Brush down the killing grid (only when it is turned off!) to remove insect fragments.
- Empty the catch tray frequently.

Thank You for Choosing PestWest®

At PestWest®, we are proud to provide innovative and trusted fly control solutions across Australia and worldwide. Thank you for being part of our journey in 2026 and beyond.

We look forward to continuing to protect environments, support businesses, and deliver the highest standard of quality and service.
