Chameleon® VEGA

The Chameleon® Vega is powerful, stylish and economical.

Its elegant and ultra-slim design, based on revolutionary new technology, combined with an all stainless steel or white all metal construction will suit most environments.

It features new higher energy efficient UVA tubes with Reflectobakt® technology powered by a state of the art electronic ballast to deliver efficient fly control with low running costs. The slimness and style of the Chameleon® Vega is achieved thanks to the latest generation of UVA tubes, which offers improved UVA performance as well as a reduction in glass content.
